

# Childress County, Texas

Report generated 2026-10-23 (UTC) from Vellora’s verified county datasets; each measure shows its own data years · Online profile: [vellora-health.pages.dev/counties/childress/](https://vellora-health.pages.dev/counties/childress/)

County FIPS code

48075

Population, 2020 Census

6,664

Rural-urban code (USDA ERS, 2023)

9 Nonmetropolitan: urban population of fewer than 5,000, not adjacent to a metro area

## Key cardiovascular indicators

HEART DISEASE MORTALITY · DEATHS 2022–2024

446.1 per 100,000

Observed, age-standardized rate. Above the median Texas county.

CORONARY HEART DISEASE · BRFSS 2023

5.9%

95% CI 5.3% to 6.7%

Age-adjusted CDC model estimate. Not distinguishable from the median county.

HIGH BLOOD PRESSURE · BRFSS 2023

34.0%

95% CI 29.9% to 38.4%

Age-adjusted CDC model estimate. Not distinguishable from the median county.

CURRENT SMOKING · BRFSS 2023

15.9%

95% CI 13.3% to 18.5%

Age-adjusted CDC model estimate. Not distinguishable from the median county.

### 1 of 27 values are not published for Childress County.

Sources withhold estimates when a population or case count is too small for a reliable or confidential figure. They are reported here as withheld, never as zero, and are not estimated.

- Suppressed by State Cancer Profiles to protect confidentiality and rate stability: fewer than 16 cases were reported over 2019–2023 (average annual count 3 or fewer).

## What these statistics represent

- **Modeled estimates** (CDC PLACES) are statistical estimates of how many adults report a condition or behaviour, built from a national survey and census data. They are not counts and cannot track change over time.
- **Observed rates** come from death certificates (heart disease deaths) or the Texas Cancer Registry (new cancer cases).
- **Crude** prevalence is the share of all adults; **age-adjusted** prevalence estimates the share under a standard age distribution so counties with different age structures can be compared. The two are never compared with each other.
- The **median Texas county** is the middle of the county estimates. It is not a statewide rate; a statewide rate is shown only where the source publishes one with the same definition.

This report is informational public-health data about a county population. It is not medical advice and says nothing about any individual’s health. For personal health questions, consult a qualified health professional; in an emergency, call 911.

## 1 measure not published for Childress County

**Colorectal cancer incidence (age-adjusted)** (Diagnoses 2019–2023): Suppressed by State Cancer Profiles to protect confidentiality and rate stability: fewer than 16 cases were reported over 2019–2023 (average annual count 3 or fewer).

# Location and social context

**Population, 2020 Census**

6,664 people

**Rural-urban classification (USDA ERS, 2023)**

Code 9. Nonmetropolitan: urban population of fewer than 5,000, not adjacent to a metro area.

**Neighbouring Texas counties (4)**

Collingsworth, Cottle, Hall, Hardeman

Childress County within Texas

| MEASURE                                                                                                                                                                                                                                                                                                                                                                                                                                               | CHILDRESS COUNTY                                                                 | AMONG TEXAS COUNTIES                                                                                   |

# Sources, methods and limitations

## Sources

**CDC PLACES county data, 2025 release (data.cdc.gov swc5-untb).** BRFSS 2023. Census Bureau 2023 county population estimates; ACS 2019–2023 or 2018–2022. Dataset: <https://data.cdc.gov/d/swc5-untb>

**CDC heart disease mortality county data, 2022–2024 (data.cdc.gov mri7-5jtw).** Deaths 2022–2024. Adults aged 35+; age-standardized to the 2000 U.S. standard population. Dataset: <https://data.cdc.gov/d/mri7-5jtw>

**State Cancer Profiles incidence, 2019–2023 (Texas Cancer Registry, SEER November 2025 submission).** Diagnoses 2019–2023. Census populations as modified by NCI (SEER population data); age-adjusted to the 2000 U.S. standard. Dataset: <https://statecancerprofiles.cancer.gov/incidencerates/index.php?stateFIPS=48&areatype=county&cancer=001&race=00&sex=0&age=001&stage=999&year=0&type=incd&sortVariableName=rate&sortOrder=default>

**U.S. Census Bureau, ACS 2024 5-year Summary File, table B17001.** 2020–2024 (pooled). People for whom poverty status is determined. Dataset: [https://www2.census.gov/programs-surveys/acs/summary\\_file/2024/table-based-SF/data/5YRData/acsdt5y2024-b17001.dat](https://www2.census.gov/programs-surveys/acs/summary_file/2024/table-based-SF/data/5YRData/acsdt5y2024-b17001.dat)

**HRSA Data Warehouse, HPSA – Primary Care: All HPSAs (BCD\_HPSA\_FCT\_DET\_PC), daily snapshot of 2026-10-18.** Designation status on 2026-10-18. Areas and population groups designated by HRSA (not a population count). Dataset: [https://data.hrsa.gov/DataDownload/DD\\_Files/BCD\\_HPSA\\_FCT\\_DET\\_PC.csv](https://data.hrsa.gov/DataDownload/DD_Files/BCD_HPSA_FCT_DET_PC.csv)

**USDA Economic Research Service, Rural-Urban Continuum Codes 2023,** with 2020 Census populations: <https://www.ers.usda.gov/data-products/rural-urban-continuum-codes>

**County boundaries:** U.S. Census Bureau cartographic boundary files via the us-atlas project.

Publishers: Centers for Disease Control and Prevention (CDC); Centers for Disease Control and Prevention, Division for Heart Disease and Stroke Prevention (data: National Vital Statistics System); Texas Department of State Health Services, Texas Cancer Registry; published by the National Cancer Institute and CDC (State Cancer Profiles, SEER submission); U.S. Census Bureau; Health Resources and Services Administration (HRSA), Bureau of Health Workforce, Division of Policy and Shortage Designation. Use of CDC data does not imply endorsement by CDC, HHS or the U.S. Government.

## Methods

- Every value is copied from the verified source files Vellora publishes; nothing is estimated, imputed or rounded beyond the source.
- CDC PLACES values are model-based estimates (multilevel regression and poststratification of BRFSS survey data), published with 95% confidence intervals from CDC's simulations. Crude and age-adjusted values are separate published series.
- The heart disease death rate covers adults 35 and over, is age-standardized to the 2000 U.S. population, averaged over three years and spatially smoothed by CDC; no interval is published.
- Each county is placed against the median of reporting Texas counties, using age-adjusted values where CDC publishes them. It is called above or below the median only when its whole confidence interval is clear of it; point estimates alone are never used to claim a difference.
- Only cancer incidence has a published statewide Texas rate with the same definition, so it is the only measure compared with Texas as a whole.

## Missing data and suppression

CDC suppresses PLACES estimates for areas with fewer than 50 residents and death rates it cannot estimate reliably; State Cancer Profiles suppresses counts of fewer than 16 cases over five years. Withheld values are shown as withheld with the source's reason; they are never treated as zero and never estimated.

## Limitations

- County figures describe populations, not individuals. Patterns across counties do not show what causes them and cannot be applied to any one person.
- Self-reported diagnoses miss undiagnosed conditions, and access to care can affect how many are diagnosed.
- Small counties have wide intervals; CDC advises against ranking counties or drawing conclusions from very broad intervals.

- Sources cover different years and populations (adults 18+, adults 35+, all ages); check each measure's year and population before comparing.
